

In a healthy community, everyone has access to health care!

As community members, we are concerned about Champaign County residents' timely access to affordable health care services.

We, the undersigned, call on all local, state, and federal government officials and elected representatives who serve Champaign County, and on all local health care providers, including Carle Clinic and Christie Clinic, to work together and to do their fair share to serve Champaign County's uninsured residents and residents with Medicaid insurance, and to assure timely access to quality, affordable health care for all Champaign County residents.

We urge you to take a leadership role in working to end the current access to care crisis facing Champaign County residents who have Medicaid insurance or who are uninsured. With your support, we can work together to create a sustainable solution that benefits our entire community.
